## PROJECTS

---

**MLS (My Love Story)** | [Github](#) | [Live](#) (React.js, Redux, Postgre, AWS, Python, CSS, HTML, Node.js)

- Leveraged Redux to optimize the information management of React components, resulting in DRY readable code and increasing scalability of a single page application
- Incorporated AWS with signed up users to upload and edit images along with a react spinner and carousel.
- Added an on change category filter and by newest from top to bottom for reading stories.

**taskPanda** | [Github](#) | [Live](#) (React.js, Redux, Postgres, AWS, Python, CSS, HTML, Node.js, Socket.IO)

- Collaborated with team members using Git workflow and Slack to achieve features in a timely manner, while switching between both frontend and backend
- Designed a search feature that pulls results from PostgreSQL database allowing users to filter by keyword.
- Also included Socket.IO, which enables live chat in real time.

**RelaxationBnb** | [Github](#) | [Live](#) (React.js, Redux, Postgres, Express, CSS, HTML, Node.js)

- Built a secure user authentication system, utilizing Bcrypt to hash and salt passwords, strengthening protection of user data.
- Streamlined user experience when managing form data, allowing users to optionally submit form changes, inclusive or exclusive of file upload.
